

# Insight-Go

## Unprecedented Visibility, Better Outcomes for Your Ready Mix Business

The next generation of ready mix reporting has arrived.

Explore your data from batch, dispatch, and delivery with confidence using a new suite of powerful tools, including enhanced dashboards, natural language processing, role-based permissions, and configurable alerts.

Reporting is now simpler, smarter, and completely self-serve. You don't need to be a data expert to use it— intuitive design and native language functionality transforms reporting from a back-office task into a collaborative, strategic tool that elevates your entire operation.

### Key Elements and Features

#### Natural Language, Supernatural Results.

Ask direct questions of your data, receive direct answers. It's that simple.

#### Built for Anyone. Used by Everyone.

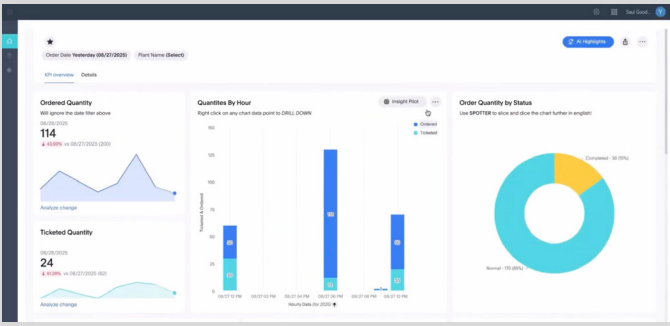

With native language functionality, everyone in your company can harness the power of data.

#### Stand-Alone Solution

Your batch, dispatch, and delivery data in one accessible view. No siloes, no integrations.

#### Enhanced Dashboards and Alerts Keep You Informed

Your data, your views. Focus on what matters to your business, and set alerts to stay in the loop.

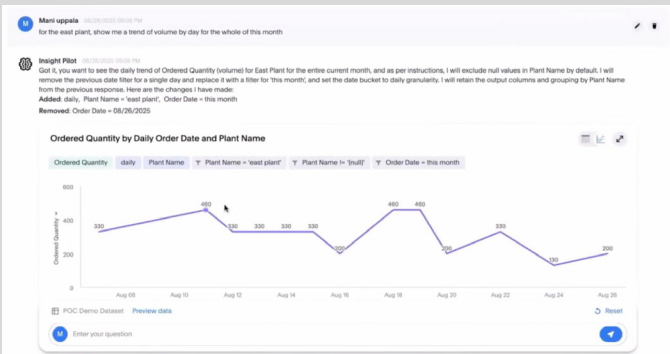

## Explore Interactive Dashboards to Find and Present Critical KPIs

Explore your data with confidence using dynamic drill downs by plant, customer, project, sales rep, and much, much more.

## Insights and Alerts Where and When You Need Them Most

Export dashboards, schedule them direct to your inbox, and more, to ensure that your data lives where you do.

Configure alerts around key KPIs, ensuring you're always in the loop when it matters most.

## Ask More of Your Data, Literally, With The AI Power of Insight Pilot

Your data holds insight. All you have to do is ask. Use natural language queries to get instant answers without complex database knowledge or technical expertise.

## Role-Based Permissions Keep Your Data In Its Rightful Place

It's easier than ever to configure reporting permissions to ensure that only authorized users have access to specific reports. Smart control means effortless security for your data.

## Delivering the value of cloud-native business solutions

Sysdyne exists for producers who refuse to let yesterday's systems dictate tomorrow's results. In an industry where every truck minute matters, we believe technology should speed you up, not slow you down. That's why Sysdyne delivers a unified, cloud-native platform connecting quoting, batching, dispatch, delivery, invoicing, and analytics into one system and one source of truth. Built specifically for ready-mix operations, Sysdyne deploys in hours, not months, is easy to use and helps producers achieve measurable ROI in weeks while creating cleaner data, faster decisions, and a stronger foundation for AI-driven operations.
