ConcreteGO is a fully integrated dispatch solution that connects with a variety of Third-Party Batching, GPS Truck Tracking, Accounting, and Concrete Quality Control programs. Purchase a subscription and Sysdyne takes care of the rest.

PRODUCT FEATURES:

- Invoicing
- Order Entry and Ticketing
- Scheduling and Truck Tracking
- POS (Point of Sales)
- Quotations
- Inventory Management
- Dashboard and KPI Reports
- Integrates with iStrada®, Pioneer® and Verifi In-Transit

CONCRETE·GO
BY SYSDYNE

How can you realize the benefits of integrated dispatch software without the time, cost or resources required to implement an on-premise solution? **Look to the cloud.** With ConcreteGO® you get the essential software your business needs with a subscription. **Pay as you go.**

CLOUD-BASED DISPATCH

CONCRETE PRODUCERS' MODERN CHOICE

Own the data

You own all of the data generated through day-to-day operations

World-class security

Rest easy knowing all of the data is being protected in secure data centers with an array of physical and network safeguards

Ongoing innovation

Stay current with the latest hassle-free technology with a cloud solution that is automatically maintained and updated

Transparent costs

Maintain control with one payment that covers software, service and support

"We could not be happier with our decision to switch to Sysdyne and ConcreteGO for our dispatching... Everything from setup to daily use is streamlined and very user friendly."

- Mandi Yurecko, GM, Kost Materials
