CLOUD·BATCH
BY SYSDYNE

BATCH CONTROL. SIMPLIFIED.

CloudBatch™, the world's 1st Cloud-Native batch control system, setting a new standard in excellence. The enhanced ability to control the concrete batching process in real-time from anywhere at anytime creates tremendous value and savings.

FEATURES

REMOTE BATCH

You can batch concrete anywhere using a PC, laptop, or view it tablet

OPEN API

CloudBatch's OpenAPI allows full data exchanges without the limitation of the traditional batch interface.

REAL-TIME INVENTORY

Inventory is automatically updated as batch operators record material receipts and load concrete

THE NEW WAY TO BATCH.

Powered by PAC

(Programmable Automation Controller)

Powered by PAC, designed for control tasks that require industrial PC computing performance and a PLC's robustness.

CloudBatch takes full advantage of PAC's ruggedness, processing power, programmability, and network connectivity.

Unsurpassed Ready Mix Performance

- Replay Loads
- Access Anytime, Anywhere
- Open API
- Offline Mode
- Simplified Maintenance
- Unified Database
- Live Reports
- Real-Time Inventory
- Observer Mode
